

OBJECTIVE

Aspiring **AI & Full Stack Developer** with a strong foundation in building accessible, data-driven applications. Passionate about solving real-world **healthcare** and **accessibility challenges** through modern **web technologies**, **Natural Language Processing (NLP)**, and **cloud solutions**.

EDUCATION

- Bachelor of Technology in Computer Science and Engineering(AI&ML), JNTUH.** 2022-26
Vardhaman College of Engineering, Shamshabad CGPA: 9.2
- Intermediate in MPC, Telangana Board of Intermediate Education (TGBIE).** 2020-22
Govt Junior College, Warangal Percentage: 94.8
- Tenth Class, Telangana Board of Secondary Education (TSBSE).** 2020
Pragathi High School, Warangal CGPA :10

ACADEMIC PROJECTS

- Memory Palace 2.0** April – May 2025
An AI-powered cognitive aid for memory-impaired users, offering interactive games and reinforcement-based learning.
 - Developed a dynamic web platform using **Next.js** for responsive UI and seamless routing.
 - Implemented secure user authentication and real-time data sync using **Supabase**.
 - Integrated ML-based personalization modules to adapt games and reminders based on user performance.
 - Designed accessible, brain-training games tailored for users with dementia and memory disorders.
 - **Tech Stack:** Next.js, Supabase, JavaScript, Tailwind CSS.
- Transformer-Based Forensic NLP System** January – May 2025
Built a forensic intelligence pipeline to analyze and visualize insights from digital text using modern NLP models.
 - Extracted entities, timelines, and event relations from forensic documents using **BERT** and **SpaCy**.
 - Created interactive visualizations in **React.js** and **D3.js** for clear presentation of extracted insights.
 - Benchmarked transformer-based NLP against traditional models to validate accuracy in forensic contexts.
 - **Tech Stack:** Python, BERT, HuggingFace, React.js, D3.js, SpaCy.
- Inclusive Lingua Bridge** March – April 2025
An AI-driven assistive platform promoting Braille literacy and accessibility for the visually impaired.
 - Designed a real-time Braille translation and audio interaction system using **ESP32** and **React Native**.
 - Enabled seamless communication via integrated **text-to-speech** and **speech-to-text** modules.
 - **Tech Stack:** Python, Firebase, ESP32, Google Speech API, React Native.
- AI-Powered Health Monitoring System** October – December 2024
AI-enabled health monitoring solution to track and analyze real-time biometric trends.
 - Implemented anomaly detection using supervised ML algorithms in **TensorFlow**.
 - Developed a data dashboard with trend graphs for user health tracking using **Flask** and **MongoDB**.
 - **Tech Stack:** Python, TensorFlow, Flask, MongoDB.
- Multipurpose Language Translator** March – May 2024
A lightweight NLP-based translation tool for voice, text, and document inputs.
 - Built a web-based instant translator supporting multiple languages and formats using **Python NLP libraries**.
 - Ensured real-time processing for speech and text via API integrations.
 - **Tech Stack:** Python (NLP), SpeechRecognition, Flask.

INTERNSHIP

•Data Science Intern

June – July 2024

YBI Foundation, New Delhi

Online

- Created customer behavior models using Python and Pandas/Scikit-learn.
- Delivered insights that influenced marketing strategies.
- Used Jupyter Notebooks, Matplotlib, and data preprocessing techniques.

•Web Development Intern

August – September 2024

Vault of Codes, New Delhi

Online

- Built and deployed 3 functional web projects using modern frontend tools.
- Designed EditKaro.in website using HTML, CSS, JavaScript.

•AI: Transformative Learning Intern

January - March 2025

Edunet Foundation (TechSaksham Initiative by Microsoft and SAP)

Online

- Completed a structured internship program focused on Artificial Intelligence, emphasizing its transformative applications across various industries.
- Engaged in real-world problem-solving scenarios, enhancing practical understanding of AI concepts and methodologies.
- Participated in mentorship sessions and collaborative projects, fostering skills in AI-driven innovation and solution development.
- Gained insights into the integration of AI technologies in business processes, supported by industry leaders Microsoft and SAP.

TECHNICAL SKILLS

Languages: C/C++, Python, Javascript, HTML+CSS

Frameworks : Flask, React.js, Next.js, TensorFlow, BERT

Cloud/Databases: Amazon AWS, Azure, Supabase, GitHub, Docker (learning))

Tools: Git, VS Code, Postman, Jupyter **Databases:** MongoDB, MySQL, Supabase Realtime

Others: REST APIs, NLP, CI/CD (basic), Agile (familiar)

CERTIFICATIONS

- **AWS Certified Machine Learning** , Infosys, May 2024.
- **AWS Certified Natural Language processing** , Infosys, July 2024.
- **NPTEL Certification in Large Language Models (LLM)** , Ministry of Education, Government of India, April 2025

ACHEIVEMENTS

- Secured Top 5 position at Inohax 2.0 Hackathon by Inovact Pvt Ltd with team BugBusters.
